Priory Farm reserves the right to close the lakes at any time. Pumps may be run periodically to irrigate crops. No responsibility will be accepted for loss, damage, injury or death etc., however caused. From time to time, the surrounding area is used for corporate entertaining.

Care of Fish Stocks

Great care must be taken when handling fish. It is advisable to return your catch in the landing net or at very least close to the water. Do not just throw them into the water, this may cause the fish to dive deeply and risk damaging themselves on the rocks close to the edge. Never handle fish with a dry cloth as this will remove their protective slime. Please do not swing in fish of 6oz or more as this may result in damaged lips and **barbless hooks** only please. Although we don't condemn braided hook lengths, we do wish to let you know that they can be harmful to fish's mouth if not used with care and attention.

Remember the fish are there for your sport and enjoyment - dead and dying ones are not!
